Personal statement

A highly focused software developer with 3 year experience in a variety of development and engineering positions. Organised, methodical and a keen eye for detail results in solid coding and trustworthy software programs. Understanding client requirements and communicating the progress of projects.

Experience

Developer, administrator @ Digital Magic Agency

May 2014– Present

Summary: Design, create, and modify web sites to match user requirements; Analyze user needs to implement web content, graphics, performance, and capacity; Clarify goals, identify problems, and suggest changes; Integrate web sites with other computer applications; Convert written, graphic, and multimedia components to compatible web formats; Communicate and negotiate with clients;

Responsibilities:

- Design, build, and maintain Web sites, using HTML, CSS, JS, PHP, WordPress and digital media;
- Perform and direct Web site updates;
- Write, design, and edit Web page content, and direct others producing content;
- Confer with management and development teams to prioritize needs, resolve conflicts, develop content criteria, and choose solutions;
- Back up files from Web sites to local directories for instant recovery in case of problems;
- Identify problems uncovered by testing and customer feedback, and correct problems and refer problems to appropriate personnel for correction;
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards, and is compatible with browsers, devices, and operating systems;
- Renew domain name registrations;
- Design and implement Web site security measures, such as firewalls and message encryption;
- Respond to user email inquiries;
- Recommend and implement performance improvements;
- Register Web sites with search engines to increase Web site traffic;
- Evaluate and recommend server hardware and software;
- Install and configure servers and operating systems.
